GYN/OB OASIS Clinical Experience Checklist

The purpose of the OASIS Clinical Experience Checklist is to ensure that each student is exposed to the depth and breadth of Obstetrics and Gynecology. After week four (4) of the rotation, please check your log and ask your attendings/residents to assist you in meeting your requirements. Each of these required experiences is objectives based.

Only log patient’s conditions or procedures that are addressed or performed during your encounter. Do not log conditions or procedures that are only part of the patient’s history.

Each student is required to log at least one patient with each of the following problems:

**Problem**
- Abnormal Labor
- Antepartum Visit
- Breast Health
- Contraception
- Diabetes in Pregnancy
- Dysplasia
- Ectopic Pregnancy
- First Trimester Bleeding
- Hypertension in Pregnancy

*remember, an individual patient may have more than one problem.*

Each student is required to log two patients whose procedures the student has either performed or assisted. For Hysterectomy, any combination of two will suffice (abdominal, vaginal, laparoscopic-assisted, robotic).

**Procedure Performed:**
- Bimanual Pelvic Exam
- Breast Exam
- Cervicovaginal Cultures
- PAP Smear
- Sterile Speculum Exam
- Vaginal Delivery
- Well Woman History/Exam – Perimenopausal/Menopausal
- Well Woman History/Exam – Reproductive Age
- Wet Prep

**Procedures Assisted:**
- Hysterectomy
- Cesarean Section
- Colposcopy
- Laparoscopy
- Tubal Ligation
