### Requests for Radiologist:
- Standard report
- STAT report
- CC report:
- Provide Images:
  - CD
  - Film

### MR Angiography
- Abdomen
- Adrenal
- Kidney
- Liver
- MRA
- Pancreas
- Other:
- Ankle (Plant and Midfoot)
- Brachial Plexus
- Brain
  - IACs
  - Neuroquant®
  - Pituitary
- Spinal
  - Spine
  - Thigh
  - Tibia and Fibula
- Wrist
- Other:

### CT Angiography
- IV Contrast required
- Abdomen
  - Aorta
  - Abdominal
- Carotids
- Cerebral
- Pelvis
- Other:
  - MR Venography:

### CT Angiography Continued
- Other:

### Enterography
- CT
- MRI

### 128-Slice CT
- 3D Rendering as indicated
- Abdomen
- Abdomen and Pelvis
- Abdomen and Pelvis (Only AP and Lat)
- Pelvis
- Pelvis (Transaxial if indicated)
- Stomach
- Renal
- CT Venography:

### Digital Mammogram
- With Computer Aided Detection (CAD)
  - Screening (Diagnostic if indicated)
  - Diagnostic (Breast Ultrasound if indicated)
  - Bilateral
  - Right
  - Left

### DEXA Scan
- Bone Density Scan (with FRAX score)

### Ultrasound
- Abdomen
  - Complete
  - Limited:
  - Aorta
  - Arterial Doppler/Duplex
  - Carotids
  - RUE (Right Upper Extremity)
  - LE (Lower Extremity – Bilateral)
  - Breast
  - Bilateral
  - Right
  - Left
  - Mamagram if indicated
  - Liver Duplex
  - OB
  - 1st Trimester (Dating/Viability)
  - Pelvis (Transaxial if indicated)
  - Pelvis (Male)
  - Renal
  - Bladder
  - Scrotum
  - Soft Tissue:
    - Thyroid
    - Venous Doppler: Lower Extremity
    - Right
    - Left
    - Bilateral
    - Venous Doppler: Upper Extremity
    - Right
    - Left
    - Bilateral
  - Other:

### X-Ray
- Abdomen: Supine & Upright
- Abdomen: AP (KUB)
- A-C Joints
- Ankle
- Calcaneus/Heel
- Cervical:
  - Routine (5 views)
  - 5 views plus flexion & extension
  - Only AP and Lat
- Chest:
  - Routine (2 views)
  - Only PA
- Clavicle
- Coccyx/Sacrum
- Elbow
- Facial Bones
- Femur
- Finger:
  - Right
  - Left
- Foot
- Forearm
- Hand
  - Right
  - Left
- Hip
- Humeral
  - Routine (5 views)
  - 5 views plus flexion & extension
  - Only AP and Lat
- Lumbar:
  - Routine (2 views)
  - 3 views
- Mandible/TMJ
- Nasal Bones
- Orbits
- Pelvis: AP
  - Ribs (with PA Chest)
- Sacroiliac Joints
- Shoulder
  - Right
  - Left
- Sinuses (Paranasal)
- Suture
- Thoracic Spine
- Tibia and Fibula
- Tow:
  - Right
  - Left
  - Bilateral
- Wrist
  - Right
  - Left
- Other:
For All Patients

- If you’ve had a prior scan to the part of the body we are to scan, please bring the prior images (preferably on CD) with you to your appointment.
- If possible, wear clothing without metal (no zippers, metal clasps, buttons, snaps or buckles; sports bra for women).
- If you are a woman of childbearing years, let our staff know if there is any chance you may be pregnant or if you’re breastfeeding.
- Arrive 15 minutes in advance of your scheduled appointment to complete the paperwork.
- Bring this order from your clinician, your insurance card(s) and photo identification.
- If you use medication to control pain or anxiety, please take them to enhance your comfort during your examination.
- If you have active asthma and sometimes require medication through an inhaler, please bring your inhaler along.
- If you are a woman of childbearing years, let our staff know if there is any chance you may be pregnant or if you’re breastfeeding.

How to Prepare for your MRI

- Let our staff know in advance if you have a pacemaker, non-coronary stent, prosthesis, surgical clips, metal implants, or any other metal objects in your body. Some implants, such as a pacemaker, are negatively affected by an MRI exam. (You are not permitted to enter the MRI room if you have a pacemaker.)
- Leave jewelry and non-essential items, metal or magnetized objects at home (watches, coins, keys, hair clips, pocketknives, and credit cards). Prior to your scan, you will be able to place personal articles in the dressing room locker.
- Let our staff know if you work or have worked around metal finishing or grinding equipment. This is particularly important if you have had metal particles get into or removed from your eyes. You will need an Orbital X-ray to clear you for metal prior to your MRI exam.

How to Prepare for your CT

- Calcium Scoring: No caffeine or nicotine 2 hours prior to the exam.
- Depending on the part of the body being scanned, you may have oral or IV contrast. There may be additional preparations for your CT as well. Our Patient Coordinators will discuss the preparations at the time you schedule your appointment.

IV contrast MRI and CT patients with one or more of the following must have their creatinine checked within 90 days before the CT and within 30 days before the MRI.

- Age 60 years old or greater
- History of renal disease, solitary kidney, kidney transplant or kidney tumor
- History of severe liver disease, liver transplant or pending liver transplant
- History of diabetes treated with insulin or other medications
- Hypertension or high-blood pressure

How to Prepare for your Mammogram

- Do not use any deodorant, perfume, powders, or ointments on your underarms or breasts. The residue left on your skin by these substances may interfere with the mammogram.
- Dress comfortably. We suggest two-piece dressing since you can leave your clothes on from the waist down.
- The best time for your mammogram is between days 7 and 14 of your menstrual cycle (day one is the first day your period starts). The procedure will be more comfortable and the findings clearer.
- For women with fibrocystic breasts, consider avoiding beverages with caffeine for 48 hours prior to your mammogram. Caffeine can make the breasts more sensitive and the mammogram more uncomfortable.

How to Prepare for your DEXA

- Refrain from taking any calcium supplements or osteoporosis medication the morning of your exam. These can skew the test results.

How to Prepare for your Ultrasound

- For Abdomens (Gallbladder, Liver)
  — a.m. appointment: Nothing to eat or drink after midnight before the exam.
  — p.m. appointment: Liquid breakfast. No food or drink 6 hours before the exam.
- Pelvic: Drink 24-ounces of water one hour prior to the exam.
  Do not empty your bladder.
- Renal/Bladder: Drink 24-ounces of water one hour prior to the exam.
  Do not empty your bladder.
- 1st Trimester: Drink 24-ounces of water one hour prior to the exam.
  Do not empty your bladder.
