Read This Before You Search

A Google search for cancer produces over 725,000,000 results! How do you know which of these sites has reliable information?

Reliable websites give you true information!
Remember these four points when you search the Internet:

Accuracy
Does the website use reliable research? Check many sources for the same information - are the results the same?

Authority
Websites that end in .org, .gov or .edu are usually the most reliable websites for health facts. Make sure the website is written by doctors, nurses, or others working in the health field.

Bias
Who pays for the website? If a company supports a website they could have control over the website and give you wrong information.

Currency
When were the facts last updated? Medical research never stops. Make sure the information is no older than 3 years.
Signs of a Scam

How can you tell if websites are telling the truth? These signs can help you decide whether a website or an ad is a scam.

- No one treatment works for everyone. Two people with the same problem may need different care. Don’t trust any website with ads for products that say it can treat any sickness.
- “Natural” doesn’t always mean safe or that it actually works.
- Fake marketers may trick you into buying their product. Products that claim to cure or treat a sickness might seem honest, but they can be completely made-up. An actor or model could have been paid to tell you they like the product. **Personal stories are not proof that the product works.**
- Big words might sound impressive, but aren’t proof that the product works. Your doctor will know the facts.
- A money-back guarantee doesn't prove that a product works.

Anatomy of a Cancer Treatment Scam
cancer.gov/cancertopics/videos/health-info-online
Video about Internet scams. (2 minutes)
Ask these questions when reading about a research study:

1. **Was this a study in the laboratory, in animals, or in people?**
   Results of research in people are more likely to apply to you.

2. **Does the study include enough people like you?**
   Were the people in the study of a similar age, sex, education level, income group, and ethnic background as you? Did they have the same health concerns and lifestyle?

3. **Was it a randomized controlled clinical trial involving thousands of people?**
   These trials give scientists the most useful information about whether a treatment or a lifestyle change is effective. But they are the most costly to do, and scientists hope to find more efficient, less expensive ways to study this in the future.

4. **Where was the research done?**
   Scientists at a medical school or large hospital, for example, often lead complex experiments or have more experience with the topic. Many large clinical trials involve several institutions or clinics, but the results may be reported by one coordinating group.

5. **Are the reported results in line with previous studies?**
   Sometimes a study will report something very different from what scientists expected to find. Any result needs to be repeated elsewhere several times before it might be considered truly valid.

---

**General Internet Site for Cancer**

**The 1st place to search:**

**National Cancer Institute (NCI) (en español)**

cancer.gov

The National Cancer Institute (NCI) is the **first place** to begin a search for reliable cancer information. The website is devoted entirely to information and research on all types of cancers.

NCI can be contacted via:

- **Phone:** 1-800-4-CANCER (1-800-422-6237), Monday through Friday, 8:00 a.m. to 8:00 p.m. ET. Services to the deaf or hard-of-hearing are also available. La información de salud en español.
- **Chat:** Monday through Friday 8:00 a.m. to 11:00 p.m. ET (English only).
- **Email:** “contact us” link La información de salud en español.
- **U.S. Mail:** BG 9609 MSC 9760
  9606 Medical Center Drive
  Bethesda, MD 20892-9760

NCI provides information on cancer symptoms, diagnosis, and treatment: including information on genetics, clinical trials, and research. A dictionary of cancer and drug terms is available. Links are provided to clinical trials.
**General Cancer Sites**

**American Cancer Society (en español)**
[cancer.org](cancer.org)
General information about cancer and treatments. Cancer Information Specialists are available 24/7 to answer questions. (1-800-227-2345)
Live chat available.

**Cancer Care (en español)**
[cancercare.org](cancercare.org)
Free support services including counseling from cancer social workers.

**Cancer Dictionary (en español)**
[cancer.gov/dictionary](cancer.gov/dictionary)
National Cancer Institute (NCI) Dictionary of 7,500+ cancer terms.

**Cancer.net (en español)**
[cancer.net](cancer.net)
Dealing with cancer resources and help finding a cancer doctor. Videos and podcasts available.

**Look Good, Feel Better (en español)**
[lookgoodfeelbetter.org](lookgoodfeelbetter.org)
Managing hair loss and changes in skin and nails. Information on local “Look Good, Feel Better” programs.

**American Society for Radiation Oncology**
[rtanswers.org](rtanswers.org)
Explains to patients, their families and the public how radiation oncologists use radiation therapy to treat cancer safely and effectively.

**Research**

**PubMed**
[ncbi.nlm.nih.gov/pubmed](ncbi.nlm.nih.gov/pubmed)
PubMed is the database from the National Library of Medicine, containing thousands of research articles written by doctors and other health professionals.

PubMed can be hard to use. Call Linda Gorman (410-550-0678) or visit the Community Health Library for help.
Clinical Trials

CancerTrialsHelp.org
cancer.org/clinicaltrials
Learn about clinical trials. Search for clinical trials. (800-227-2345).

CenterWatch
centerwatch.com
Help with the research process and what to expect if taking part in study. Information on drugs in clinical trials and new FDA approved drugs.

Clinical Trials at Johns Hopkins
hopkinsmedicine.org/kimmel_cancer_center/research_clinical_trials
Information about studies offered at the Johns Hopkins Kimmel Cancer Center.

ClinicalTrials.gov
clinicaltrials.gov
Database of privately and publicly funded clinical studies conducted around the world.

Hopkins Cancer Resources

Hopkins Kimmel Cancer Center
hopkinsmedicine.org/kimmel_cancer_center/patient_information
Patient and family services. (410-955-8934)

Hopkins Health Library
hopkinsmedicine.org/healthlibrary
Health topics and Hopkins doctors.

MyChart at Hopkins
mychart.hopkinsmedicine.org
Access your Hopkins medical records. (Mobile app available.)

Johns Hopkins Home Care Group
hopkinsmedicine.org/homecare
Home care services including training, medical supplies and equipment, infusion, hospice, and caregiving help. (410-288-8100)

Called to Care
hopkinsmedicine.org/jhbm/calledtocare
Program to assist and recognize caregivers. (410-550-8018)
Support

4thAngel.org
4thangel.org
Specially trained volunteers and cancer survivors.

Lotsa Helping Hands
lotsahelpinghands.com
Set up a personal group calendar for organizing helpers.

Cancer Care Support Groups
cancercare.org/support_groups
Online, phone, and face-to-face free support groups for cancer patients, caregivers, and family members led by cancer social workers. (1-800-813-4673) or email info@cancercare.org

Cancer Support Community
cancersupportcommunity.org
Links to support groups, caregiving, research and more during cancer treatment.

I Can’t Believe I Have Cancer
cantbelieveihavecancer.org
Links to prayers. Request prayers or chat with a chaplain. Chat with a Chaplain: (844-322-4642). Mon-Fri 9am-11pm ET

Payment Help

American Cancer Society Hope Lodge
cancer.org/hopelodge
Programs and services to help patients and family members manage their lives with cancer.

CancerCare (en español)
cancercare.org/financial
Payment assistance for cancer patients. Social Worker: (800-813-4673) Mon-Thurs 9am-7pm, Fri 9am-5pm ET Provides limited payment help to qualified cancer patients. Provides links to more payment help.

Cancer Net (en español)
cancer.net/all-about-cancer/managing-cost-cancer-care
Help with cancer costs, including health insurance, and the 2010 Health Reform Law.

Corporate Angel Network
corpangelnetwork.org
Fly free to treatment for qualified cancer patients. (914-328-1313)

Needy Meds (en español)
needymeds.org
Free or low cost medicine payment programs. (800-503-6897)

Vickie's Angel Walk
vickiesangelfoundation.org
Payment information for medical and non-medical expenses. (717-774-3800)

Patient Resource
patientresource.com
Many links to payment help.
