

Johns Hopkins Bayview Community Research Advisory Council

**Pamela Ouyang MBBS, Deputy Director ICTR
Crystal Evans MS, Research Program Manager
Research Participant & Community Partnership Core**

Why was the Johns Hopkins Bayview Community Research Advisory Council formed?

- Johns Hopkins Bayview Medical Center recognized the value of ongoing collaborations between researchers and community members.
- Community leaders and advocacy groups served by Johns Hopkins Bayview expressed an interest in working with researchers to address health issues that impact local residents.

Johns Hopkins Bayview Community Research Advisory Council Vision Statement

Researchers and community members working together to increase public trust, understanding, and involvement in research that positively impacts patients and local residents in the Bayview community.

Johns Hopkins Bayview Community Research Advisory Council Mission and Goals

- Promotes the trust, understanding, and involvement of community members in the research process.
- The advisory council's goals include:
 - Working with community to identify research priorities
 - Enhancing community access to research through outreach
 - Informing researchers about the community perceptions of research
 - Advising researchers about how to engage community in research

Johns Hopkins Bayview Community Research Advisory Council Accomplishments

- Formed advisory council in 2011.
- Conducted a focus group that identified health and research topics of concern to local residents of the Bayview community.
- Reviewed and provided feedback on the Johns Hopkins Bayview clinical research website.
- Developed a clinical research booklet to educate community members about the research process.

Johns Hopkins Bayview Community Research Advisory Council Future Directions

- Determine how the Council can best assist Johns Hopkins Bayview, researchers and the IRB
- Conduct outreach to increase public awareness and trust in research
 - **Community Health Forum: Monday May 11, 2015**
- **Refine** the council's structure (membership terms, voting practices, core guidelines/values)
 - Board Development committee
 - Community Outreach committee
 - Steering Committee

Community Health Forum

- Monday May 11, 2015
 - 5-8 pm, AAC
- Agenda (see handout):
 - Dinner and opportunity for research participants and community members to meet researchers and learn about the research on the Bayview campus / surrounding communities
 - Posters about research projects (for lay audience)
 - Brief presentations about research in diseases of interest
 - Awards for participants/research ambassadors

Please help make this event a success

- Inform your faculty
- Invite research participants, community members, community boards
- Develop posters: our C-RAC community members will review to assure they are understandable by a lay audience
- Participate in event

Researchers are welcome at C-RAC meetings

- Share information about their research projects
- Members who can provide information about patient and local resident views on research
- C-RAC members can suggest ways to disseminate information about studies and study results to the community
- Meetings are held on Monday eve (usually 3rd Mon in April, June, Oct, Dec from 6-7:30 pm in 301 building)

Committees

- *Board Development*: Participate in member recruitment, selection, and orientation. Help develop and administer member satisfaction survey
- *Community Outreach*: Share health and research information at community events sponsored by Johns Hopkins Bayview; and at your church/community meeting
- *Steering Committee*: Identify research and outreach projects that members can work on. Promote the Bayview C-RAC to the Scientific Advisory Council, faculty, and staff
