Welcome to Research Roundup—the Johns Hopkins Bayview Scientific Advisory Board's (BSAB) new bi-monthly research newsletter. Through this newsletter, we'll be shedding light on exciting research news happening on the Johns Hopkins Bayview campus, and providing updates on events and funding opportunities for Medical Center faculty.

**Research News**

**Congratulations, Dr. Dan Hale**

Daniel Hale, Ph.D., director of the Healthy Community Partnership and adviser to Medicine for the Greater Good at Johns Hopkins Bayview, was awarded the 2018 Maryland Foundation for Psychiatry (MFP) Anti-Stigma Advocacy Prize for his June 2016 article in the Baltimore Sun, "We Need to Talk About Depression."

Through his years of research on the topic, Dr. Hale discusses the stigma commonly associated with depression, including how people are too often perceived as weak because of it, or are reluctant to admit their symptoms to others.

Dr. Hale recently published the third edition of his book, *Building Healthy Communities Through Medical-Religious Partnerships*, which he co-authored with Richard Bennett, M.D., and Panagis Galiatsatos, M.D. On May 30, a celebration was held on campus to recognize the Medical Center's volunteers and celebrate the book’s release.

**New Shuttle Route**

On July 2, a new Blue Jay shuttle route will be established between the Homewood campus and Johns Hopkins Bayview. The shuttle will run every 30 minutes, Monday through Friday, between 8 a.m. and 5 p.m. Pick-up and drop-off will take place at Hopkins Bayview Circle, in front of the Asthma & Allergy Center. Students, staff and faculty are welcome to travel between campuses on the shuttle; please present your Hopkins ID to board.

If you would like to have a Homewood student work in your lab, please consider posting the job opportunity on the Student Employment Services site:

**POST A HOMEWOOD JOB OPPORTUNITY**

**BSAB Meetings**

Our monthly meetings are currently in summer recess. BSAB meetings will resume in September. We will announce our speaker lineup in the August Research Roundup. Stay tuned!

**Research Events**
3rd Annual Community Forum on Healthy Aging Research

Monday, June 11, 4 to 8:30 p.m.

The Johns Hopkins Bayview Community Research Advisory Council invites you to their annual forum to engage surrounding communities in the clinical and research activities at Johns Hopkins Bayview and around the institution.

CCHR Research Rounds

**Time:** Thursdays, 12 to 1 p.m.

**Location:** Johns Hopkins Bayview, Mason F. Lord Building, Center Tower, Suite 4200 (Telecom access in Rubenstein 2nd Floor Conference Room, JHH)

Lunch is provided.

**June 14:** Yu-Hsiang Hsieh, MS, M.D., Associate Professor, Emergency Medicine

**June 21:** Matthew Hamill, MBChB, MPH, MSc, Ph.D., Assistant Professor, Medicine

New Faculty Orientation Lunches

Does your department have any new faculty starting this July? Or perhaps you’re new to the Johns Hopkins Bayview team? We’re holding a series of New Faculty Orientation Lunches this summer. All of the lunches will be catered, and held in the Mason F. Lord Center Tower, Room 301, from 12 to 1 p.m. on the following dates:

Tuesday, July 24
Tuesday, August 28
Tuesday, September 11

These lunches aim to help new faculty members meet their colleagues, get to know the Baltimore area, and learn about the various programs and opportunities at Johns Hopkins Bayview.

Please RSVP to BayviewViceDean@jhmi.edu.
Edward Mallinckrodt, Jr. Foundation Grants

The Edward Mallinckrodt, Jr. Foundation funds basic biomedical research to support early-stage investigators engaged in biomedical research that has the potential to significantly advance the understanding, diagnosis or treatment of disease.

Investigators should bear in mind that the board selection process is shepherded by trustees with a medical/scientific background, but the lay summary is critical to connecting to the lay members of the board who ultimately have an important role in the final selection of award recipients.

Institutions and their research offices should bear in mind that given the number of applications received, the foundation is very interested in the selection process that results in an investigator’s sponsorship for an EMF grant. The foundation will examine closely the support the institution will provide and the promise the institution sees for their proposed investigators’ submissions.

Proposals must contain an adequately detailed description of the project to be clearly understandable by the scientific members of the board. They need not be in the detail requested by the NIH for R01 grants and should not exceed five pages in length. Additional material can be submitted, but the five-page application should contain the essential information. References should also be included to support the proposal. Note that the five-page limit is only for the project description.

Deadline: June 14. Apply Here.

National Endowment for the Arts: Our Town Program

Our Town is the National Endowment for the Arts’ creative place-making grants program. These grants support projects that integrate arts, culture and design activities into efforts that strengthen communities by advancing local economic, physical, and/or social outcomes. Successful Our Town projects ultimately lay the groundwork for systemic changes that sustain the integration of arts, culture and design into strategies for strengthening communities.

Deadline: June 21. Apply Here.

Value Innovation Teaching and Leadership Program

Apply today to the High Value Practice Academic Alliance’s Value Innovation Teaching and Leadership (VITAL) professional development program for junior faculty. This 12-month training program prepares early-career physicians with the knowledge and experience to lead high-value care projects and serve as mentors for medical trainees. Participants also attend the HVPA’s annual High Value Health Care Conference on September 21 to 23 at the Baltimore Convention Center for free. This conference provides both CME and MOC credit, as well as the opportunity to collaborate on multicenter quality improvement projects and publications.

HVPA, led by Johns Hopkins Medicine, is a consortium of more than 85 academic medical centers across the nation that share their high-value work and collaborate to disseminate value-based best practices of care.

Deadline: June 15. Apply Here.
