Johns Hopkins HealthCare (JHHC) provides a full spectrum of health care products and services for Employer Health Programs, Priority Partners, and US Family Health Plan. Each line of business possesses its own unique contract and guidelines which, for benefit and payment purposes, should be consulted to know what benefits are available for reimbursement. Specific contract benefits, guidelines or policies supersede the information outlined in this policy.

RETIRE

THIS POLICY HAS BEEN RETIRED

POLICY:

BACKGROUND:

Fundus Photography involves the use of a retinal camera to photograph the back of the eye (fundus regions: vitreous, retina, choroid, and optic nerve). This procedure is used to monitor and document diseases affecting the eye and to follow the progression of eye-related diseases. For diabetics, annual pupil exams of the fundus are critical. Fundus screening examinations play an important role in identifying diabetic retinopathy (visual loss due to diabetes) and can be prevented by laser treatment if spotted early. In addition, the early identification and treatment of hemorrhages (microaneurysms), exudates, and other changes may be sight sparing

CODING INFORMATION:

CPT Copyright 2016 American Medical Association. All rights reserved. CPT is a registered trademark of the American Medical Association.

Note: The following CPT/HCPCS codes are included below for informational purposes. Inclusion or exclusion of a CPT/HCPCS code(s) below does not signify or imply member coverage or provider reimbursement. The member's specific benefit plan determines coverage and referral requirements. All inpatient admissions require pre-authorization.
Employer Health Programs (EHP) **See Specific Summary Plan Description (SPD)

Priority Partners (PPMCO) refer to COMAR guidelines and PPMCO SPD then apply policy criteria

US Family Health Plan (USFHP), TRICARE Medical Policy supersedes JHHC Medical Policy. If there is no Policy in TRICARE, apply the Medical Policy Criteria
