

Provider Update

This update contains pertinent information about changes that will impact the Johns Hopkins HealthCare provider network.

USFHP Pharmacy Network Change

Effective July 1, your Johns Hopkins US Family Health Plan patients will have access to all Walgreens pharmacies to fill their prescriptions. Please note that this includes any former Rite Aid that has converted to a Walgreens. Until now, Rite Aid had been the exclusive pharmacy provider for Johns Hopkins USFHP. New member ID cards were mailed out in mid-June with the updated prescription information. We also mailed a letter informing members of the addition of Walgreens to their pharmacy network.

The mail order prescription process for USFHP members remains the same.

In the coming months, Rite Aid pharmacies will be phased out of the USFHP network. At that time, Walgreens will become Johns Hopkins USFHP's pharmacy network provider.

Please contact the JHHC Provider Relations department at 1-888-895-4998 with any questions or concerns
