

Guest Speakers at the Symposium of Humanity and Medicine

Abraham Verghese, MD, MACP

Abraham Verghese, MD, MACP is the Linda R. Meier and Joan F. Lane Provostial Professor and Vice Chair for the Theory & Practice of Medicine, as well as the Internal Medicine Clerkship Director at Stanford University School of Medicine. His research

interests lie in development of clinical skills and the bedside exam, both in its technical aspects, but also in the importance of the ritual and what is conveyed by the physician's presence and technique at the bedside. Dr. Verghese is also the author of *My Own Country*, *The Tennis Partner* and *Cutting for Stone*. He is a member of the Association of American Physicians and was elected to the Institute of Medicine of the National Academy of Sciences.

Danielle Ofri, MD, PhD

Danielle Ofri, MD, PhD, is a physician at Bellevue Hospital and associate professor of medicine at NYU. She writes about medicine and the doctor-patient connection for the *New York Times*, and other publications. Danielle is co-founder and Editor-in-Chief of the *Bellevue*

Literary Review, the first literary journal to arise from a medical setting. Danielle is the author of four books about the world of medicine: *What Doctors Feel: How Emotions Affect the Practice of Medicine*, *Medicine in Translation: Journeys with my Patient*, *Incidental Findings: Lessons from my Patients in the Art of Medicine*, *Singular Intimacies: Becoming a Doctor at Bellevue*.

Kenneth M. Ludmerer, MD

Kenneth M. Ludmerer, MD, is an internist, medical educator, and historian of medicine. He is Professor of Medicine in the School of Medicine and Professor of History in the Faculty of Arts and Sciences at Washington University, St. Louis. Dr. Ludmerer is best known for

his work in medical education and health care policy. His books include *Learning to Heal*, on the creation of America's system of medical education, which was nominated for a Pulitzer Prize and Bancroft Prize. His subsequent book, *Time to Heal*, an examination of the evolution of American medical education from the turn of the century to the present era of managed care, has been called by reviewers "a masterpiece of great national importance" and was also nominated for a Pulitzer Prize and Bancroft Prize.

Lloyd B. Minor, MD

Lloyd B. Minor, MD is the Carl and Elizabeth Naumann Dean of Stanford University School of Medicine. Previously, he was the provost and senior vice president for academic affairs of Johns Hopkins University, and formerly the Andelot Professor and Director

of the Johns Hopkins Department of Otolaryngology-Head and Neck Surgery. At Stanford, Dr. Minor has championed Precision Health as the next generation of health care focused on keeping people healthy and providing care that is tailored to individual variations. Additionally, Dr. Minor has led the development and implementation of an innovative model for cancer research and patient care delivery and has also launched an initiative in biomedical data science to harness the power of big data and create a learning health care system. Dr. Minor is a member of the Institute of Medicine of the National Academy of Sciences.

Symposium on Humanity and Medicine

Furthering the Art of Doctoring

Sponsored by
The John Conley Foundation and
The Johns Hopkins University
School of Medicine

Johns Hopkins Medical Institutions
Turner Auditorium

December 10, 2016
8:30 a.m. - 3:00 p.m.

Medicine is changing at an unprecedented rate. Should Oslerian humanist principles enshrining the doctor-patient bond endure, or should humanism in medicine be re-imagined to accommodate the rise of data in medicine, and the increasing mandate to consider population health? Are patient-centered care and personalized medicine the modern incarnations of humanistic medicine? Please join our symposium of notable physicians, philosophers, writers, and educators including Drs. Kenneth Ludmerer, Lloyd Minor, Danielle Ofri, Abraham Verghese and distinguished Johns Hopkins faculty as we discuss and grapple with the place of humanism in current-day medicine.

Dr. John Conley was a renowned head and neck surgeon who received his medical training from the University of Pittsburgh in 1937 and served as an Army Surgeon during World War 2. During his wartime service and in his subsequent years at Columbia University, he pioneered novel techniques for the reconstruction of major head and neck defects. He was committed to humanism in medicine, and in the early 1990's established the John Conley Foundation for Ethics and Philosophy in Medicine. He passed away on October 2, 1999.

Symposium on Humanity and Medicine Schedule

Topic	Speaker	Time
Introduction of John Conley	Charles Cummings, MD	8:30 AM
Opening remarks	Paul Rothman, MD	8:35 AM
Introduction and definition of the issues encompassing care and training	Yuri Agrawal, MD	8:40 AM
Preservation of excellence in American medicine	Kenneth Ludmerer, MD <i>Discussant:</i> Matt Stewart, MD PhD	8:45 AM
What doctors feel	Danielle Ofri, MD	9:15 AM
<i>Coffee break</i>	---	9:45 AM
Concerns of the students and young doctor medical students and residents	Roy Ziegelstein, MD and selected medical students and residents	10:00 AM
Lives in medicine: "What matters is that all this did happen"	Jacek Mostwin, MD	11:00 AM
Implications of precision health	Lloyd Minor, MD	11:30 AM
<i>Lunch</i>	---	12:00 PM
Creating the environment of humanity in post-graduate training structure (Panel)	<i>Moderator:</i> Glenn Treisman, MD <i>Panelists:</i> John Flynn, MD; David Hellman, MD; Justin McArthur, MD; Robert Higgins, MD; Peter Pronovost, MD	1:00 PM
Humanity and medicine	Abraham Verghese, MD	2:30 PM
