

Johns Hopkins All Children's Hospital

Johns Hopkins All Children's Hospital in St. Petersburg, Florida, is a leader in children's health care, combining a legacy of compassionate care focused solely on children since 1926 with the innovation and experience of one of the world's leading health care systems.

The 259-bed teaching hospital, ranked as one of *U.S. News & World Report's* Best Children's Hospitals, stands at the forefront of discovery, leading innovative research to cure and prevent childhood diseases while training the next generation of pediatric experts. With a network of Johns Hopkins All Children's Outpatient Care centers and collaborative care provided by All Children's Specialty Physicians at regional hospitals, Johns Hopkins All Children's brings care closer to home.

Johns Hopkins All Children's Hospital consistently keeps the patient and family at the center of care while continuing to expand its mission in treatment, research, education and advocacy.

Nationally and Internationally Recognized Care

Johns Hopkins All Children's Hospital treats patients from throughout Florida and the southeastern United States, and from the Caribbean, Latin and Central America, and the Middle East. The Johns Hopkins All Children's International Program includes bilingual international coordinators who facilitate culturally sensitive patient- and family-centered care.

Among Johns Hopkins All Children's Hospital's specialty services are:

Cardiology

- Offers evaluation and treatment for patients with congenital heart defects, cardiomyopathy, heart failure, hypertension, arrhythmias and other heart problems
- Offers cardiology services at the main campus and throughout the west coast of Florida through outpatient care centers and affiliations
- Features a 22-bed cardiovascular intensive care unit with ECMO (extracorporeal membrane oxygenation) suites.

Cancer & Blood Disorders Institute

- One of the largest pediatric cancer centers in the southeastern United States, the oncology program is an active member of the Children's Oncology Group and provides access to phase I studies.
- The only certified treatment center in Florida offering chimeric antigen receptor (CAR) T cell immunotherapy
- Pediatric thrombosis program helps children with blood clots and clotting disorders, and provides access to clinical trials.

Institute for Brain Protection Sciences

- Neurosurgery team treats patients with brain tumors, seizure disorders and other problems of the head and spine, offering keyhole and robotic-assisted neurosurgical procedures.
- Institute offers comprehensive subspecialty care, including neurology, epileptology, stroke, neuro-oncology, neuroradiology, developmental medicine, and physical and rehabilitative medicine.
- Expertise in mental health, including mental development issues, cognitive disorders, trauma-informed care and bullying

Maternal, Fetal & Neonatal Institute

- Expert care for high-risk expectant mothers, continuing through delivery and neonatal intensive care unit (NICU) admission and extending beyond discharge through neonatal follow-up clinics
- 1,200 admissions annually—including 140 very low and 65 extremely low birth weight infants—to 97-bed American Academy of Pediatrics Level IV-rated neonatal intensive care unit
- Prenatal diagnoses of congenital heart defects and other congenital anomalies

Pediatric Surgery

- Pediatric general surgeons are at the forefront of complex surgery, including treating chest wall deformity, congenital diaphragmatic hernia, neonatal surgery, surgical oncology care and advanced miniature access surgery.
- Surgical specialties include pediatric, orthopaedic and scoliosis surgery, plastic and reconstructive surgery, and urologic surgery.

Other Specialty Services

- The Cystic Fibrosis Foundation designated it as a national CF Center and CF Therapeutics Development Center, specializing in clinical trials to evaluate promising new therapies.
- The LifeLine critical care transport team brings patients to Johns Hopkins All Children's Hospital for care using lifesaving technology, including ECMO, nitric oxide and heliox therapy.
