THE JOHNS HOPKINS HOSPITAL

For more than 125 years, the mission of The Johns Hopkins Hospital has been to lead the world in the diagnosis and treatment of disease and to train tomorrow’s great physicians, nurses and scientists. Above all, we aim to provide the highest-quality health care and service to all our patients.

As the teaching hospital affiliated with the Johns Hopkins University School of Medicine, we are located in the heart of East Baltimore, at 1800 Orleans Street. The hospital includes the Johns Hopkins Children’s Center and the Johns Hopkins Kimmel Cancer Center.

Nationally and Internationally Recognized Specialty Care

Based on the U.S. News & World Report Best Hospitals 2020–21 Honor Roll, The Johns Hopkins Hospital is ranked #3 in the nation and #1 in Maryland. With this annual ranking and combined with our Best Children’s Hospital ranking, The Johns Hopkins Hospital remains the top-ranked hospital for patients of all ages.

Patient- and Family-Centered Care

The Johns Hopkins Hospital promotes a culture that embraces, expects and rewards the delivery of patient- and family-centered care. We partner with patients, families and others to create a treatment plan that works for each patient and family.

Part of a Premier, Integrated System

The Johns Hopkins Hospital, founded in 1889, and the Johns Hopkins University School of Medicine, created in 1893, form the nucleus of Johns Hopkins Medicine, one of the world’s premier, integrated health systems. It includes six hospitals, six community-based health care and surgery centers, more than 40 primary and specialty care practices throughout the region, and managed care and home care services.

March 2021
RECOGNITION

- Based on the U.S. News & World Report Best Hospitals 2020–21 Honor Roll, The Johns Hopkins Hospital is ranked #3 in the nation and #1 in Maryland. With this annual ranking and combined with our Best Children’s Hospital ranking, The Johns Hopkins Hospital remains the top-ranked hospital for patients of all ages.

- The Johns Hopkins Kimmel Cancer Center is one of only 51 cancer centers in the country designated by the National Cancer Institute as a Comprehensive Cancer Center. The Johns Hopkins Hospital ranked #4 in the nation for Cancer, based on U.S. News & World Report’s 2020-21 rankings.

- Johns Hopkins Children’s Center, Maryland’s largest children’s hospital, offers recognized centers of excellence in dozens of pediatric subspecialties, including allergy, cardiology, cystic fibrosis, fetal therapy, gastroenterology, nephrology, neurology, neurosurgery, oncology and pulmonology.

- The Johns Hopkins Hospital is designated a level I trauma center, a level IV perinatal referral center, a level 1 Pediatric Trauma and Burn Center, and the Eye Trauma Center for the state of Maryland.

- In 2003, the Johns Hopkins Hospital nursing program was the first in Maryland to receive Magnet designation from the American Nurses Credentialing Center. The hospital received Magnet redesignation in 2008, 2013 and 2018.

- The Johns Hopkins Hospital’s Stroke Program and Ventricular Assist Device Program are certified by The Joint Commission.

- The Johns Hopkins Hospital’s Comprehensive Inpatient Rehabilitation Unit is accredited by the Commission on the Accreditation of Rehabilitation Facilities.

- The Johns Hopkins Hospital is designated as a regional Ebola and Other Special Pathogen Treatment Center by the U.S. Department of Health and Human Services.

- In 2019, The Johns Hopkins Hospital earned Gold Certification for Excellence in Person-Centered Care from Planetree International, a nonprofit organization that recognizes health care organizations globally for innovation in and dedication to person-centered care. Johns Hopkins is the first major academic medical center in the country to receive this designation.

INNOVATIONS

- Discovered the first effective treatment for severe forms of sickle cell disease (1995).
- Developed and performed the world’s first minimally invasive live-donor kidney removal (1995).
- Developed a way to deliver chemotherapy drugs directly to a brain tumor (1996).
- Was among the first to isolate and cultivate human embryonic stem cells (1998).
- Showed that HPV is associated with the development of certain head and neck cancers (2000).
- Planned and performed the most challenging double-arm transplant to date (2012).
- Johns Hopkins researchers spurred the signing of the HIV Organ Policy Equity (HOPE) Act, which lifted the ban on transplanting organs from people living with HIV (2013). Johns Hopkins researchers performed the first such transplant in the U.S. (2016).
- Launched the Bloomberg–Kimmel Institute for Cancer Immunotherapy to develop promising therapies to eradicate cancer (2016).
- Developed a single blood test that screens for eight common cancer types and helps identify the cancer’s location (2018).
- Surgeons successfully performed the first total penis and scrotum transplant in the world (2018). The recipient is a veteran who sustained injuries during service in Afghanistan.
