Nationally and Internationally Recognized Specialty Care
The Johns Hopkins Hospital ranked #1 in Maryland and #4 in the nation on U.S. News & World Report's Best Hospitals 2021–22 Honor Roll. The hospital has been designated as one of the top 5 hospitals in the nation for all 32 years of the U.S. News & World Report rankings.

Patient- and Family-Centered Care
The Johns Hopkins Hospital promotes a culture that embraces, expects and rewards the delivery of patient- and family-centered care. We partner with patients, families and others to create a treatment plan that works for each patient and family.

Part of a Premier, Integrated System
The Johns Hopkins Hospital, founded in 1889, and the Johns Hopkins University School of Medicine, created in 1893, form the nucleus of Johns Hopkins Medicine, one of the world's premier, integrated health systems. It includes six hospitals, four health care and surgery centers, four ambulatory surgery centers, more than 40 primary and specialty care outpatient sites under Johns Hopkins Community Physicians, and managed care and home care services.

BY THE NUMBERS
Licensed acute care beds ............... 1,162
Annual inpatient admissions ............ 39,850
Annual outpatient visits ............... 365,868
Annual ER visits ..................... 73,305
Full-time physicians .................. 2,447

RECOGNITION

- The Johns Hopkins Hospital ranked #1 in Maryland and #4 in the nation on U.S. News & World Report’s Best Hospitals 2021–22 Honor Roll. The hospital has been designated as one of the top 5 hospitals in the nation for all 32 years of the U.S. News & World Report rankings.

- The Johns Hopkins Kimmel Cancer Center is one of only 51 cancer centers in the country designated by the National Cancer Institute as a Comprehensive Cancer Center. The Johns Hopkins Hospital ranked #6 in the nation for Cancer, based on U.S. News & World Report’s 2021–22 rankings.

- The Johns Hopkins Hospital is designated a level I trauma center, a level IV Perinatal Referral Center, a level 1 Pediatric Trauma and Burn Center, and the Eye Trauma Center for the state of Maryland.

- In 2003, The Johns Hopkins Hospital nursing program was the first in Maryland to receive Magnet designation from the American Nurses Credentialing Center. The hospital received Magnet redesignation in 2008, 2013 and 2018.

- The Johns Hopkins Hospital is fully accredited by The Joint Commission and earned its Gold Seal of Approval in several specialty areas, including the Advanced Comprehensive Stroke Center certification.

- The Johns Hopkins Hospital’s Comprehensive Integrated Inpatient Rehabilitation Unit is accredited by the Commission on the Accreditation of Rehabilitation Facilities.

- The Johns Hopkins Hospital is designated as a Regional Emerging Special Pathogens Treatment Center by the U.S. Department of Health and Human Services.

- In 2019, The Johns Hopkins Hospital earned Gold Certification for Excellence in Person-Centered Care from Planetree International, a nonprofit organization that recognizes health care organizations globally for innovation in and dedication to person-centered care. Johns Hopkins is the first major academic medical center in the country to receive this designation.

INNOVATIONS

- Developed and performed the world’s first minimally invasive live-donor kidney removal (1995).
- Developed a way to deliver chemotherapy drugs directly to a brain tumor (1996).
- Was among the first to isolate and cultivate human embryonic stem cells (1998).
- Showed that HPV is associated with the development of certain head and neck cancers (2000).
- Launched paired kidney exchange, in which a living donor who is incompatible with an intended recipient exchanges kidneys with another donor/recipient pair (2001).
- Developed the first biologic pacemaker for the heart, paving the way for an alternative to implanted pacemakers (2002).
- Pioneered kidney transplants among incompatible donors and recipients (2002).
- Found the genes for and described Loeys-Dietz syndrome, a previously unrecognized disorder characterized by severe aneurysms (2006).
- Developed a “safety checklist” that screens for eight common cancer types and helps identify patients who have received organ transplants, prompting the FDA/CDC to recommend third doses for this population (2021).
