The Johns Hopkins Outpatient NeuroRehabilitation program

provides comprehensive rehabilitation care for adults with neurological illness or injury following an inpatient hospitalization or rehabilitation stay.

Our Team—all experts in brain dysfunction—recognizes the unique needs of each patient. We tailor every treatment plan to achieve individual goals, collaborating with patients and their families to improve functional gains and enhance quality of life.

Our Specialists

- Psychiatrists (rehabilitation medicine)
- Rehabilitation neuropsychologists
- Occupational therapists
- Speech language pathologists
- Physical therapists
- Social workers
