The Johns Hopkins Hospital and University of Delaware Acute Care Physical Therapy Residency

This program aims to develop physical therapists that will:
- Provide innovative and evidence-based care to the medically complex population.
- Advocate for and advance the integral role of physical therapy and rehabilitation in the management and prevention of impairments.
- Possess system skills such as outcome measurement, quality improvement, project management and leadership within an interdisciplinary team.
- Act as strong patient and family advocates.

Program benefits:
- Salary and full-time benefits.
- One-on-one clinical mentoring.
- Variety of unique didactic experiences.
- Opportunity to participate in clinical research and graduate level teaching.
- Leadership skill development.

Details:
- 12-month long program
- Clinical exposure to all acute care physical therapy service lines including general medicine, oncology, orthopaedics, neurosciences, and cardiopulmonary populations.
- Multi-disciplinary structured observations.
- Participation in scholarly activities including, case presentations, multidisciplinary education, and clinical education.
- Research opportunities including early mobility in the ICU, preventing readmissions and diagnosis-specific quality improvement.
- Clinical and classroom teaching at the University of Delaware DPT program.
- Participation in Johns Hopkins Research Development Program.
