

The Division of Child, Adolescent and Transitional Age Youth Services, part of the Community Psychiatry Program at Johns Hopkins Bayview Medical Center, serves children, adolescents and transitional age youth who have:

- attention difficulties
- learning problems
- impulsive or aggressive behavior
- depression
- anxiety
- substance abuse problems
- school difficulties, including an overall decline in performance
- social adjustment
- behavior problems
- psychosis

Referrals are made by families, school personnel, physicians or social agencies. Medical assistance and some private insurances are accepted.

Baltimore, MD 21224

Preschool Therapeutic Learning Center *(Intensive Outpatient Program)*

For children ages 2 to 5 and their caregivers

The Preschool Therapeutic Learning Center provides diagnostic evaluation; a parents' group; socialization and therapy groups for children; and occupational therapy evaluation and treatment. Referrals to clinic staff for psychological testing, and speech and language evaluations are made as needed.

The Children's Center Intensive Outpatient Program

For children ages 5 to 12

The Children's Center offers psychiatric evaluations; individual and family counseling; medication evaluation; nursing support; and if necessary, occupational therapy assessment. Referrals for psychological testing also may be provided.

Adolescent Intensive Outpatient Program

For adolescents ages 11 to 18

Services similar to those offered in the Children's Center are provided to pre-teens and adolescents ages 11 to 18 in the Adolescent Intensive Outpatient Program. Treatment interventions focus on Dialectical Behavior Therapy (DBT) and Structured-Psychotherapy for Adolescents Responding to Chronic Stress (SPARCS), a DBT trauma treatment-focused intervention.

Child Mobile Treatment Services

For individuals ages 3 to 24 with behavioral and emotional problems who require intensive treatment to remain in the community

Child Mobile Treatment provides short-term community- and home-based services, including therapy, case management and psychiatric care to help patients avoid hospitalization; receive necessary community support and services; and preserve families.

Early Childhood/Preschool Outpatient Clinic

For children ages 5 and younger

Our team consists of a child psychiatrist and four therapists with special interest in and experience working with very young children and their families. An initial assessment with a licensed clinician is followed by team discussion to develop an individualized treatment plan, with referral for other services, such as speech and language evaluation, as needed.

School-based Mental Health Services

For children and teens ages 4 to 19

Services are available in several schools within Baltimore City and County, and include evaluation; individual, group and family therapy; diagnostic assessment and medication evaluation.

Child & Adolescent Psychiatric Rehabilitation Program

For youth ages 5 to 18

This after school program provides treatment for the development of educational, social and independent living skills. Services are available up to 5 days per week for 3.5 hours per day and are provided in conjunction with mental health treatment. For those in greater need, off-site services may be available.

Child Case Management

For individuals ages 3 to 24 who need mental health and community services coordination

Child Case Management uses an in-depth home assessment and an individualized patient plan to provide an array of services, including assistance with daily family functioning in the home; school behavior and monitoring; advocacy in schools and with Social Services; resource procurement; and coordination with other providers. Services are provided in conjunction with mental health treatment.

General Outpatient Services

For youth ages 6 to 22

Outpatient services include diagnostic evaluations; psychological assessments; medication evaluation and follow-up; group therapy; and casework services. Children and caregivers may attend individual, family or group treatment sessions as part of treatment.

Specialized Outpatient Programs

Transitional Age Youth Program

For youth ages 16 to 22

Services are coordinated between the adolescent and adult outpatient programs to include traditional outpatient services, case management and vocational rehabilitation. In addition, an on-site psychiatric rehabilitation program assists with the development of pre-vocational, educational, social and independent living skills.

Co-Occurring Disorders in Adolescence (CODA) Clinic

For teens and young adults ages 14 to 22 with substance abuse and mental health disorders

Treatment includes an initial evaluation, a diagnostic interview with a psychiatrist, 12 weeks of individual and group therapy, and medication management, as needed. Random drug screens may be provided.

La Clinica de la Familia Latina/Latino Family Clinic

For youth ages 4 to 21 and/or whose caregivers do not speak English

Diagnostic evaluation, individual and family therapy, and medication management are provided by a physician and clinicians who speak Spanish.

Early Psychosis Intervention Clinic (EPIC)

For teens and young adults who are experiencing a psychotic episode or have been diagnosed with a psychotic disorder in the past year

EPIC provides psychiatric evaluations; second opinion diagnostic consultations; individual therapy; family support and education groups; and medication management services. The goal of the program is to reduce psychotic symptoms, avert hospitalization, improve compliance with outpatient services and improve overall day-to-day functioning.

Child Psychiatry Overeating Clinic (CHOC)

For children and teens 6 to 18 years old who are overweight or obese, and are struggling with binge eating disorder or other mental health issues

Program services include diagnostic consultation and psychiatric evaluation with follow up treatment. Behavioral therapy with positive reinforcement; group therapy; family therapy; nutritionist consultations; coordination with pediatricians; and education related to healthy eating are available.

Clinic for Deaf and Hard of Hearing (CDHH)

For individuals ages 6 to 22 and/or their caregivers who are deaf or hard of hearing, and have a mental health disorder

The clinic offers individual and family therapy, and medication management. Services are provided in American Sign Language by a certified interpreter/licensed clinician.
