Healthy Volunteers Needed For Oxytocin and Decision-Making Research Study

Healthy men and women 18 years of age and older are needed to participate in a research study at the Johns Hopkins Bayview Medical Center.

This is not a treatment study. The study tests whether oxytocin can influence decisions and other types of thinking.

Participation involves an initial phone screening and an in person screening visit.

If qualified, this study requires 2 sessions lasting approximately 3 hours each.

You will be paid up to $250 for completing the study.

For more information, please call (410) 550-1465.

Principal Investigator: Matthew W. Johnson, Ph.D.
Protocol #: IRB00133379
