

We Need Former NFL Players for Imaging

Did you recently step away from NFL play?

We're using imaging at Johns Hopkins to study the brain after sports-related concussions.

To qualify for the study, you must:

- be between **23 and 40 years of age**
- have at least **2 years** of experience in the NFL
- be **within 10 years** of last NFL play

Qualified participants will undergo a PET scan, an MRI scan, and an optional lumbar puncture. Those completing the study will receive a compensation for time and travel. Please contact Dr. Jennifer Coughlin at 443-287-4701 or jcoughl2@jhmi.edu for more details.

Principle Investigator: Martin Pomper, M.D., Ph.D., Application #: IRB00030788
