JOHNS HOPKINS MEDICINE
Approved Nov. 5, 2013

Have you been diagnosed with Parkinson's disease?

OR

Are you interested in helping those with Parkinson's by participating in research?

Johns Hopkins is conducting a research study to learn about how cognitive function and particularly memory is affected in those diagnosed with Parkinson's disease.

Participation Includes:

- Completing a study visit at the Johns Hopkins Hospital
- Completing questionnaires
- Completing a series of paper and pencil tests
- Completing an MRI scan
- Compensation for your time and travel expenses

You may qualify for this study if:

- You are between the ages of 18 and 85
- You have received a **clinical diagnosis of Parkinson's disease** OR **you have not been diagnosed with Parkinson's disease, have no memory or other cognitive problems, and are in generally good health**
- You are able to have a MRI scan
