Are you over 60 and feeling depressed?

Symptoms of depression in older adults are common yet often go undetected. Symptoms could include:

- feelings of sadness or hopelessness
- loss of energy
- inability to enjoy pleasurable activities
- changes in appetite or sleeping patterns
- poor concentration/memory

If you are feeling depressed, not taking antidepressant medication and in good physical health, you may be eligible to participate in a research study involving treatment.

Qualified people will participate at no cost to them. Compensation for time and transportation will be provided.
