Are you and your child interested in helping to understand how the brain affects food intake over time?

You and your child may be eligible to participate in the BEAM research study if your child is:

- 9-11 years old
- Not currently in a weight loss program
- Available to come to Johns Hopkins Hospital for 5 study visits (3 - 7 hours each)
- Willing to have a blood draw and MRIs

Compensation up to $345 for your child’s participation and completion of the study.
