Adolescent Subjects Needed!

Brain Imaging (MRI) Study

Researchers at the Johns Hopkins University are seeking adolescents, ages 13-18, to participate in a new study that uses a brain imaging technique called magnetic resonance imaging, or MRI, and involves cognitive tests/games and answering questions about your life, behaviors, and stressful events.

The study involves no medications, no blood draws etc. Qualified people will be compensated and participate at no cost to them. Participants under the age of 18 years will only be enrolled with the consent provided by a parent or guardian.

You may be eligible if you:

(a) Are 13-18 years old
(b) Have no medical contraindications to completing an MRI scan

The study involves one three hour session, part of which will include the MRI scan. You will be paid $50 for your participation.

If you are interested in participating or would like further information please email: chammo20@jhmi.edu

All emails/calls are confidential.
