Are you between 13 and 18 years old?

Brain Imaging (MRI) Study
We are conducting brain imaging research using a technique called magnetic resonance imaging, or MRI, to take pictures of the brain while you participate in games/cognitive tasks.

*In this study you will perform cognitive tests/games and answer questions about your life, behaviors, and stressful events.*

*The study involves no medications, no blood draws etc.*

*Qualified people will be compensated & participate at no cost to them.*

*Participants under the age of 18 years will only be enrolled with consent provided by a parent or guardian.*

The study involves one 3 hour session, part of which will involve the MRI scan. You will be paid $50 for your participation.

Please call or email: (410) 550-0048 or chammo20@jhmi.edu for details

*All Calls and Emails are Confidential*
