

Wilmer Microscopy and Imaging Core Facility (MICF), Smith Building

Fee Schedule for FISCAL 2022, effective July 1, 2021 to June 30, 2022

Changes to number of per persons allowed per training package are marked in red

Billing will occur twice a year, mid-year and after the fiscal year close. You will receive an invoice to approve and provide a budget number(s) at that time. An SAP cost transfer will be uploaded on our end to complete the process. Please contact Mary Ellen mpease@jhmi.edu if you have any questions.

****Please remember to cite the Wilmer Core Grant, Microscopy Module, P30-EY001765 in your publications. This includes TEM and ultramicrotomes, confocals and 2P systems, Sony FACS, Cellomics, LCM, Accuri, and Imaris software.****

Service	Cost	Description
Confocal hourly rate (all LSMs)	10/hr	<i>Each PI will pay by the hour for users under their group assignment. Cancellations <24 hrs before start time will be charged for 30' use.</i>
Confocal Novice User Training concepts and practical use	500	<i>This consists of 2 x 3hr sessions, with practice required in between. Session 2 -to certify readiness for access. This is a single person training protocol.</i>
Confocal Orientation For users with prior experience	250 for 1 session, 500 if 2 required	<i>For users who have some prior experience on other systems. This is typically one session with certification at the end. If a second session is needed, the cost is \$500. This training may include up to 2 individuals.</i>
Confocal Certification or Consult (FRAP, 2Photon, Super Resolution, environmental system, etc)	100	<i>For users who have prior experience on a Zeiss LSM and need to be checked to be certified for independent use or need project specific consultation. This is a single person training.</i>
TEM hourly rate	10/hr	<i>Each PI will pay by the hour for users under their group assignment. Cancellations <24 hrs before start time will be charged for 30' use.</i>
TEM Novice User Training concepts and practical use	500	<i>This consists of 2 x 3hr sessions, with practice required in between. The second session is to certify readiness for access. This is a single person training protocol.</i>
TEM Orientation for users with prior experience	250	<i>For users who have some prior experience on other systems. This is typically one session with certification at the end. If a second session is needed, the cost is \$500. This training may include up to 2 individuals.</i>
TEM Certification	100	<i>For users who have experience on a similar Hitachi and need to be checked to be certified for independent use. This is a single person training.</i>
Ultramicrotome hourly rate	5/hr	<i>Each PI will pay by the hour for users under their group assignment.</i>
Ultramicrotome Training for thick or thin sectioning	500 for thicks, 250 for ultrathins (750 for both)	<i>This consists of 2 x 3hr sessions, with practice required in between. The second session is to certify readiness for access. Those receiving ultrathin training will have an additional session. This is a single person training protocol.</i>
Epoxy methods for LM or TEM sample prep and sectioning training program	1500	<i>Epoxy processing/knifemaking/thick and thin sectioning training. This requires multiple hours which varies from trainee to trainee. Users will be certified on the ultramicrotome at the end and are required to provide their own sectioning supplies and diamond knife.</i>
Fee for Service Projects (charged hourly)	100	<i>Can include TEM sample prep, thick and or thin sectioning, staining, imaging for or with investigator (driving the TEM or confocal)</i>
