

Provider Update

This update contains pertinent information about changes that will impact the Johns Hopkins HealthCare provider network.

Additional Information on the JHHC and CVS Health-NovoLogix Partnership for Preauthorization of Medical Injectables

Effective Date: July 1, 2021

Lines of Business: Johns Hopkins Advantage MD, Johns Hopkins Employer Health Programs (EHP) and Priority Partners

Type of Change: New requirements and enhanced authorization process

Explanation of Change:

Effective July 1, 2021 Johns Hopkins HealthCare (JHHC) will require prior authorization for certain provider-administered medications. As previously communicated, this requirement is already in place for Priority Partners. This new requirement will apply to members enrolled in Johns Hopkins Employer Health Programs (EHP) and Johns Hopkins Advantage MD. There are no changes for USFHP.

Also effective July 1, 2021, the process for obtaining these prior authorizations will be managed in collaboration with CVS Health–NovoLogix for EHP and Advantage MD. Additionally, Priority Partners will be moving its direct prior authorization services to the CVS Health-NovoLogix platform as of this date.

Lists of Applicable Codes
