

## BRAIN EFFECTS ON APPETITE & METABOLISM STUDY

Are you and your child **interested** in helping to understand how the **brain affects food intake** over time?

You and your child may be eligible to participate in the BEAM research study if your child is:

- 9-11 years old
- Not currently in a weight loss program
- Available to come to Johns Hopkins Hospital for 5 study visits (3 - 7 hours each)
- Willing to have a blood draw and MRIs

Compensation up to \$345 for your child's participation and completion of the study
