

ATTENTION PARENTS OF CHILDREN AGES 12-17

We are looking for adolescents to participate in an MRI research study to learn if there are differences between the brain's structure & its function in adolescents with and without ADHD

Who: Adolescents with ADHD & typically developing adolescents

What: 1 virtual session and 2 in-person visits consisting of an interview, questionnaires, computer games, paper & pencil tasks & a Magnetic Resonance Imaging (MRI) scan of the brain.

You will receive free IQ testing with a report of results & a picture of your child's brain!

Where: Kennedy Krieger Institute in Baltimore, MD

Benefit: There are no significant risks or direct medical benefits for participating in this study

Compensation: \$50.00 per day of study participation

Contact: Alyssa DeRonda, email: DeRonda@kennedykrieger.org
